热熔胶膜 Hot melt adhesive film

垣凡热转印刻字膜 Heat transfer vinyl

垣凡胶膜
垣凡刻字膜

公司简介

上海垣凡（安徽垣隍）新材料科技有限公司一直致力于环保热熔胶膜的研发、生产及销售，以完善及提高产品质量为目标，力求生产高品质高性能产品。目前形成了热转印刻字膜、热熔胶膜等具有独特应用性能的产品体系。

公司产品PO、PA、PES、TPU、EVA热熔胶膜，广泛应用于服装服饰、鞋帽鞋材领域，箱包配件装饰，汽车内饰，建材装饰材料及电子工业等应用领域。垣凡热熔胶膜，能有效解决各种材料的粘接难题。

垣凡热转印刻字膜由于产品环保、质量稳定得到了客户群的一致好评与认可。目前产品体系包括：PVC、PU刻字膜、PU厚版膜、软金属镭射、金葱、植绒刻字膜及可打印膜。

垣凡用专业的技术，生产实用的产品；用真诚的热情，恪守诚信之门。

Shanghai YuanFan (AnHui YuanHuang) New Material Science and Technology Co., Ltd. has been committed to the research and development of environment hot melt adhesive film's production and sale, in order to improve the quality of products as the goal, strive to produce high quality performance products. At present, a product system with unique application properties has been formed, such as heat transfer printing film and hot melt adhesive film.

Company products PO, PA, PES, TPU, EVA hot melt adhesive film, widely used in clothing decoration, shoes, hats, bag accessories decoration, car interior, building materials, electronic industry and other applications. YuanFan hot melt adhesive film can effectively solve the bonding problem of all kinds of materials.

Because of the products environmental protection and quality stability, YuanFan heat transfer vinyl has been unanimously praised and recognized by the customer base. The current product system includes PVC, PU, PU thick, soft metallic, hologram, glitter, flock transfer vinyl and printable film.

YuanFan uses professional technology to produce practical products, abide by the door of integrity with sincere enthusiasm.

Hot melt adhesive film

Product name	Application field	Product technical indicators					
		Exterior	Material	Melting point	Temperature	Pressure	Time
TPU Hot melt adhesive film	Waterproof three-layer belt, seamless underwear, seamless shoe surface processing, seamless pockets, seamless zipper compounding, placket and brim compounding, compound processing of various elastic fabrics such as nylon cloth, lycra cloth, and bonding of reflective materials.	Transparent and soft with elasticity	Polyurethane	100~120°C	130~170°C	1.5-3KG	8~12s
PES Hot melt adhesive film	It can bond all kinds of textile fabrics, PVC, ABS, PET, all kinds of plastics, leather and all kinds of artificial leather mesh, aluminum foil, aluminum plate, veneer, etc., used in seamless shoe materials, brim luggage materials, reflective materials, automotive interiors And electronic shielding materials.	Milky white translucent	Polyester	110°C	130 ~150°C	1.5~3KG	8 ~12s
PO Hot melt adhesive film	Adhesive for embroidery labels, badges, woven trademarks, and label fabrics; lamination of fabrics, fabrics and textiles.	Transparent	Polyolefins	110°C	130~160°C	1.5-3KG	8~12s
EVA Hot melt adhesive film	It is used for textiles, aluminum foil mylar, PET, PP, EVA foam, leather, nonwovens, wood, paper, glass and various plastics that do not require high washing.	Transparent	Ethylene vinyl acetate	65~80°C	110°C	1.5-3KG	8~12s
PA Hot melt adhesive film	Due to its good washing resistance and dry cleaning resistance, it is used by customers for the bonding of high-end clothing and clothing accessories and the bonding of stainless steel plates.	Transparent with blue light	Copolyamide	115°C	160°C	1.5-3KC	8~12s

The hot melt adhesive film series products produced by our company use green and environmentally friendly high molecular raw materials and film-like hot melt adhesive films produced by advanced coating technology. Used to bond two same or different materials, with strong bonding strength and superior washing resistance. The products have a complete range and a wide range of uses, which are suitable for the needs of various industries.

Product thickness: 0.03mm-0.30mm, width: 20~150cm, packaging specification: 100 yards or 100 meters.
